

My Town

I like my town. It is easy to find the school, the church and stores because the roads are laid out in a **rectangular grid**. The Avenues are North to South. The Streets are East to West.

The church  is located on 3rd Avenue and 8th Street. To save time, we write this as (3,8). The first number is the Avenue. The second number is the Street. These are called the **coordinates** of the church. Complete this table.
