

Mystery Animal

Can you draw the mystery animal? To do this, you will need;

- Pencil and eraser
- Grid paper
- Coloured pencils or crayons

On the grid paper supplied,

- Number the x-axis from -10 to 9.
- Number the y-axis from -14 to 14.

Now plot these co-ordinates. After plotting each point, draw a line joining it to the previous point.

As you plot each point, cross it off the list.

Do **NOT** join dots from different sections.

If you make a mistake, erase it and then plot the points correctly

Section A

(6,8)	(5,6)	(6,4)	(2, -4)	(0,-5)	(-1,-6)	(-2,-9)	
(-1,-11)		(0,-12)	(0,-13)	(-3,-12)	(-3,-11)	(-4,-9)	(-4,-6)
(-6,-9)		(-8,-11)	(-8,-12)	(-1,-14)	(-7,-14)	(-10,-13)	(-10,-11)
(-8,-9)		(-6,-3)	(-5,1)	(-3,3)	(2,6)	(2,10)	(3,11)
(5,12)		(9,10)	(9,9)	(6,9)	(9,8)	(8,7)	(4,8)

Section B

(6,3)	(7,3)	(7,2)	(5,2)
-------	-------	-------	-------

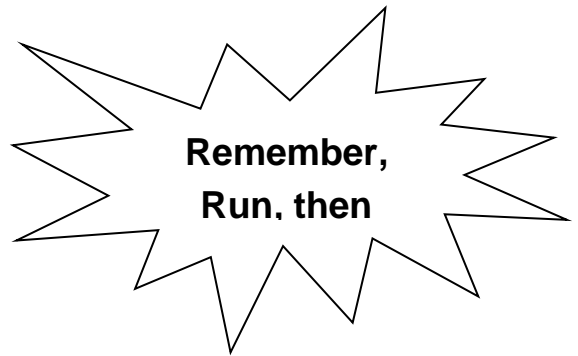

Section C

(3,3)	(5,1)	(7,1)	(7,0)	(4,0)	(2,2)
-------	-------	-------	-------	-------	-------

Section D

(2,-4)	(3,-11)	(4,-12)	(4,-13)	(1,-12)	(1,-11)	(0,-5)
--------	---------	---------	---------	---------	---------	--------

Now draw in any detail you wish and colour your mystery animal as you want.
