

Estimating and Measuring Angles

For the angles in Group 1:

1. Estimate the size of each angle in the group. Write it in the estimate column of the table.
2. After estimating each angle, measure the size of each angle. Write the answer in the table.
3. Calculate the difference between the estimate and the angle. Write the answer in the table.
4. Find the mean of these differences.

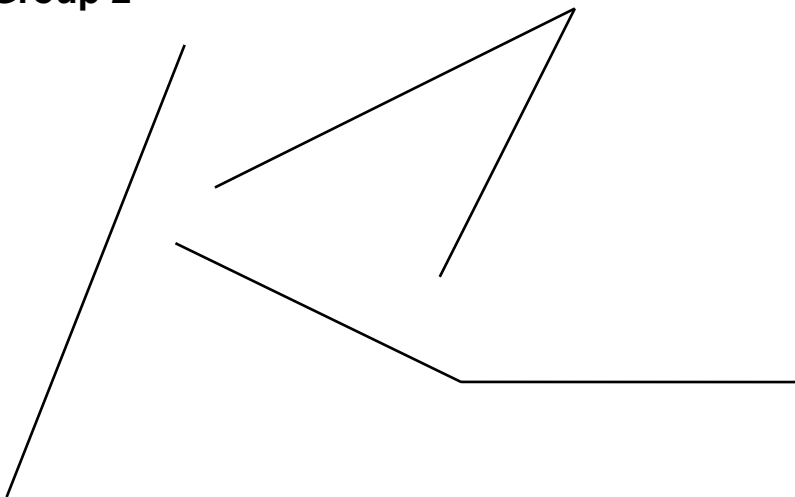

Repeat these steps for Groups 2 to 5. Does your estimating get better with practice?

Group 1

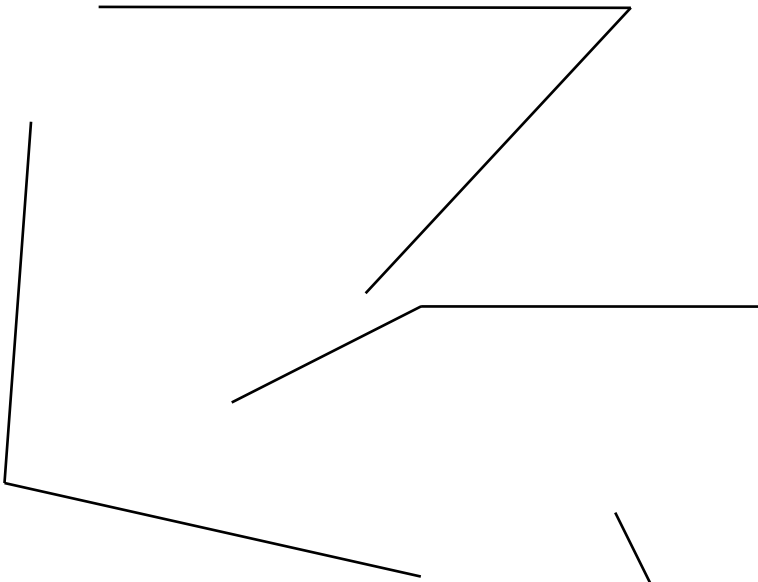

Angle	Estimate	Measure	Difference
1			
2			
3			
Mean Difference			

Group 2

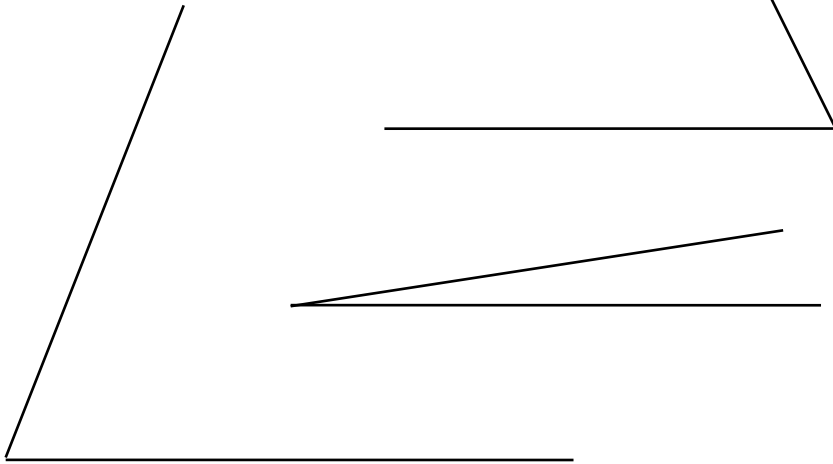

Angle	Estimate	Measure	Difference
1			
2			
3			
Mean Difference			

Group 3

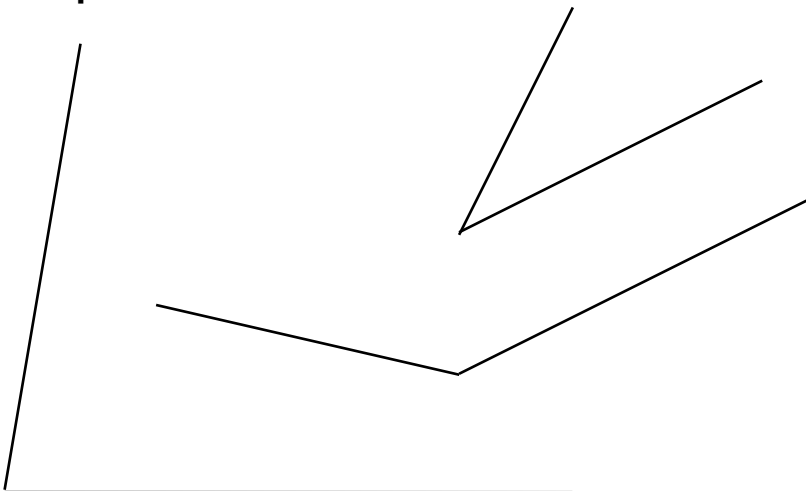

Angle	Estimate	Measure	Difference
1			
2			
3			
Mean Difference			

Group 4

Angle	Estimate	Measure	Difference
1			
2			
3			
Mean Difference			

Group 5

Angle	Estimate	Measure	Difference
1			
2			
3			
Mean Difference
