

Area of Triangles

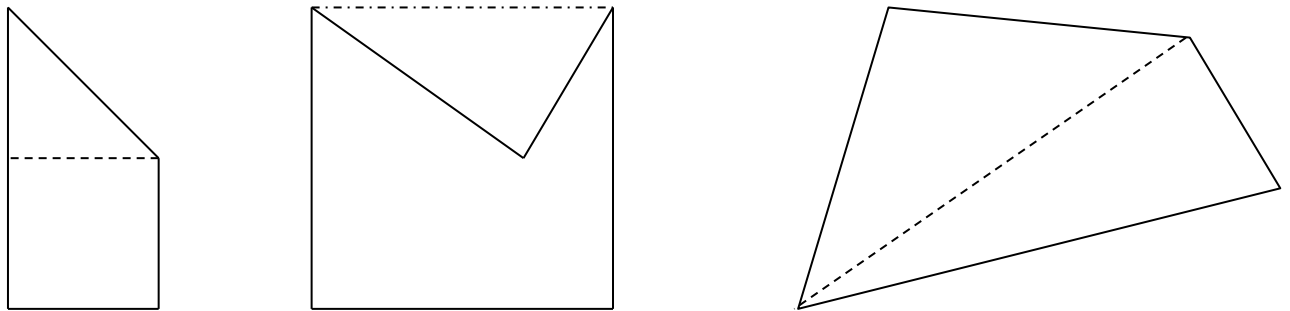

Directions: All measurements should be in millimetres. Areas should be expressed in square millimetres.

You may write on this sheet **but you must set out the answers the questions in your Maths notebook.**

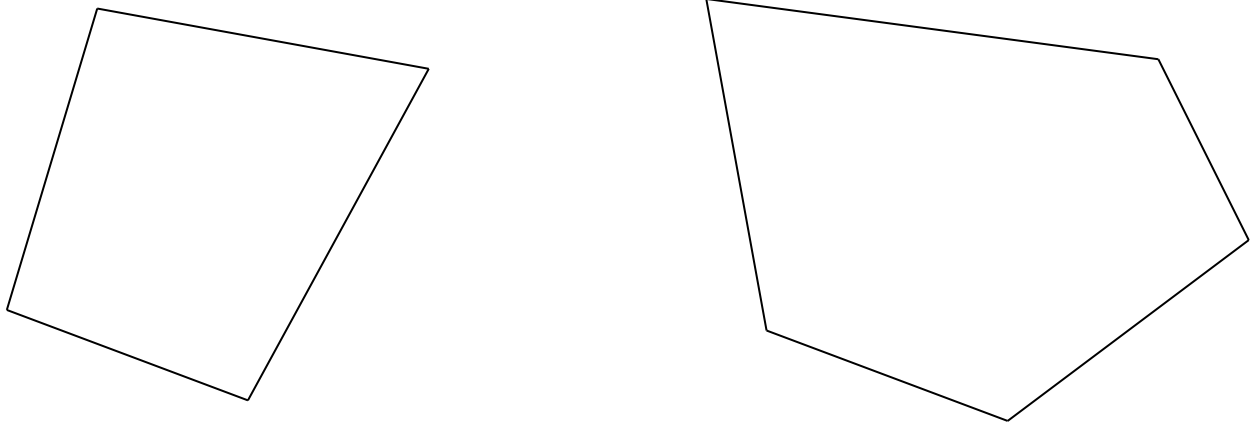

1. Find the area of each of the following triangles.

2. Find the area of each of these shapes. The dotted lines might help you plan your solution.

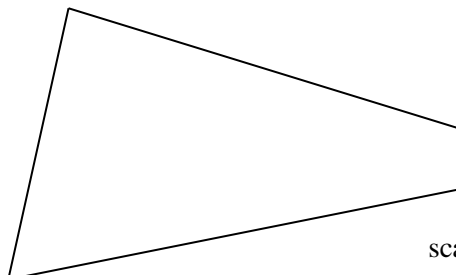

3. Find the area of each of these shapes.

Challenge!

4. A scale drawing of Farmer Brown's South Paddock is shown below. Find the area in hectares.

Recall: 1 hectare = 10 000 m²

scale: 1 cm represents 100 metres
