2-4-6-8

Name _____ **Score** _____

Produce expressions for the **natural numbers** from 1 to 50, using the digits 2, 4, 6 and 8. Each of these digits must be used exactly once in each expression. You may use any mathematical operations.

Two hard examples: $2^{\sqrt{4}^{8}} + 6 = 22$ and $\frac{4! + 6}{2} - 8 = 7$

Record your solutions below. *Use a pencil in case you make a mistake.*

1		2		3	
4		5		6	
7		8		9	
10		11		12	
13		14		15	
16		17		18	
19		20		21
