

# Roller Derby

**Materials:** Two 6-sided dice and 12 markers per team; one Roller Derby game board per table.

**Group Size:** 2 or 3 students per team; 2 teams per table.

Roller Derby is a game played between two teams, called Team A and Team B.

To begin, each team distributes its markers between the boxes on its side of the game board. A reduced size game board is shown alongside.

The dice are rolled and the total is calculated.

If a team has a marker on that number, they can remove it.

This is repeated until one team removes its last marker and wins.
